

Enhance facility safety with FM Property Loss Prevention Data Sheets

Reduce risk at both existing and under-construction facilities with FM's proven engineering guidelines.

Backed by nearly 200 years of expertise, FM's Property Loss Prevention Data Sheets help minimize property loss from fire, weather, and equipment failures. Developed with input from industry experts, these standards help your insureds become more resilient. Access them at fm.com/resources/fm-data-sheets.

How data sheets can help you and your insureds:

- **Expert Technical Guidance:** Get detailed insights on various occupancies and specific hazards.
- **Proven Best Practices:** Implement top strategies for loss reduction and resilience.
- **Easy-to-Understand Codes:** Simplify compliance with guidelines that meet or exceed most corresponding codes.
- **Policy Development Support:** Access comprehensive guides to create and evaluate human element policies.
- **Comprehensive Insights:** Each data sheet includes a scope, loss prevention recommendations, support for recommendations and references.

Data sheet topics:

1. Construction
2. Sprinklers
3. Water supply
4. Extinguishing equipment
5. Electrical
6. Boilers and industrial heating equipment
7. Hazards
8. Storage
9. Miscellaneous
10. Human factor
11. Pressure vessels
12. Mechanical
